

ABHIJITH S R

SENIOR BACKEND ENGINEER

Solution-focused Senior PHP Engineer with nearly 5 years of experience delivering, modernizing, and maintaining enterprise web applications. Strong expertise in Core PHP, Laravel, Symfony, and CodeIgniter with hands-on experience in REST API development, application architecture, and performance optimization. Proven ability to migrate legacy Core PHP systems to modern frameworks, improve code maintainability, and support scalable cloud-based deployments. Adept at end-to-end solution delivery, cross-functional collaboration, and continuous improvement of application quality.

PROFESSIONAL EXPERIENCE

Software Engineer

PIT Solutions (P) Ltd  July 2023 - Present

- Delivered scalable backend solutions using Symfony and Laravel for enterprise-grade web applications.
- Built a dental medical practitioner hiring platform using Symfony and React, implementing multi-role authentication for Recruiters, Professionals, and Admin users.
- Implemented contract job management, invoice generation, and timesheet tracking modules.
- Developed an education platform for acupuncture medical training using Laravel and React, supporting course management, video content delivery, certifications, and user workflows.
- Designed REST APIs to support frontend and third-party integrations.
- Collaborated with frontend, QA, and product teams to ensure timely and high-quality solution delivery.

PHP Web Developer

iAntz IT Solutions(P) Ltd  October 2021 - June 2023

- Designed and developed a full-featured e-commerce platform using Laravel, including secure admin panels, product catalogs, order processing, and mobile application APIs.
- Built a multi-tenant Learning Management System (LMS) using Laravel to support multiple schools and teachers, including subscription management and payment integration.
- Engineered a custom ERP solution using Laravel with modules for HR, inventory, billing, and reporting.
- Led migration and refactoring of legacy Core PHP modules into Laravel-based MVC architecture, improving maintainability and scalability.
- Developed a questionnaire and survey management system using CodeIgniter for international college programs.
- Built and maintained RESTful APIs using CodeIgniter for mobile applications used by non-profit organizations.
- Optimized database queries and improved application performance through indexing and code refactoring.

Junior PHP Web Developer

Zewia Software Solutions(P) Ltd March 2020 - June 2021

- Developed basic HTML and Core PHP-based websites and WordPress applications.
- Created website UI wireframes and designs using Adobe XD and Photoshop.
- Contributed to a School Exam Management System built on CodeIgniter.
- Developed Tours and Travels websites with third-party currency converter API integrations.
- Gained hands-on experience in Core PHP development and REST API consumption.
